G.I. JOE

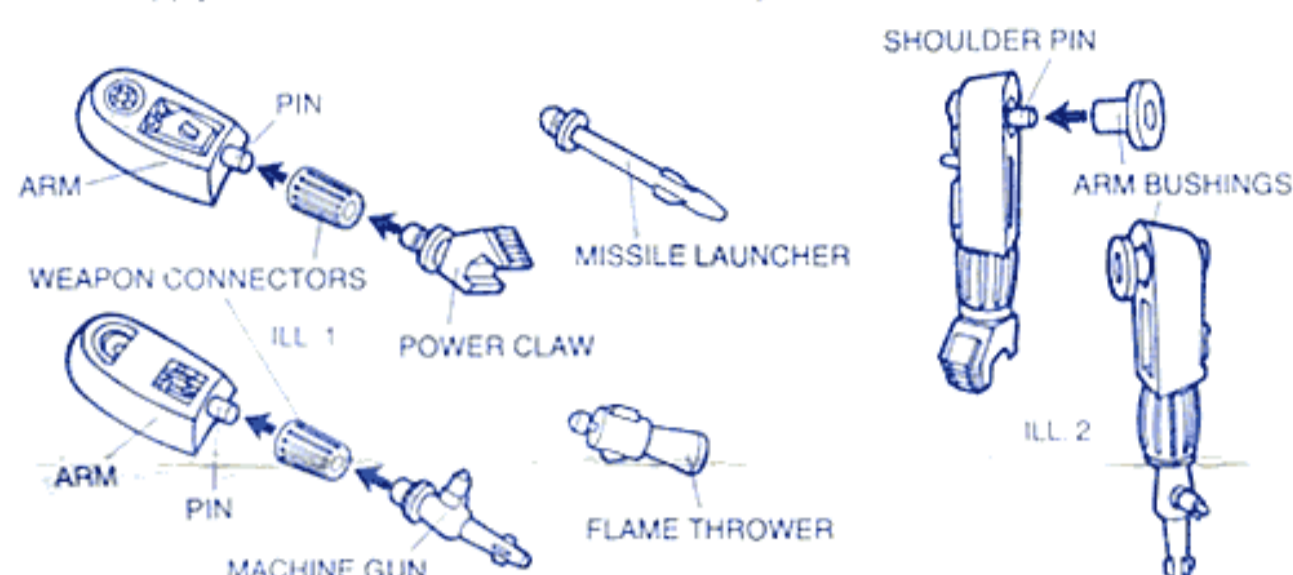

"S.N.A.K.E."™ Instructions (System: Neutralizer-Armed Kloaking Equipment)

A COBRA Command Weapon!

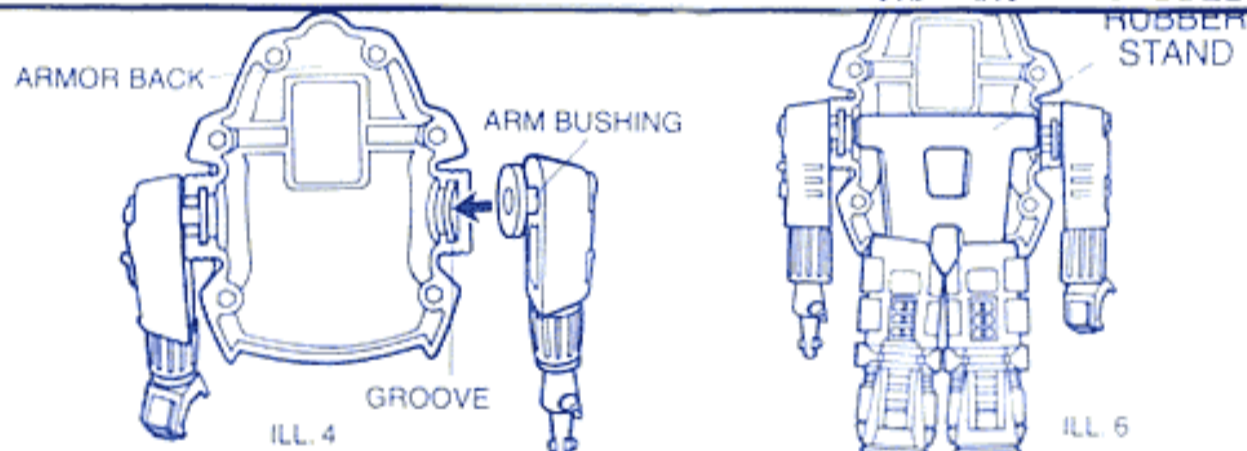

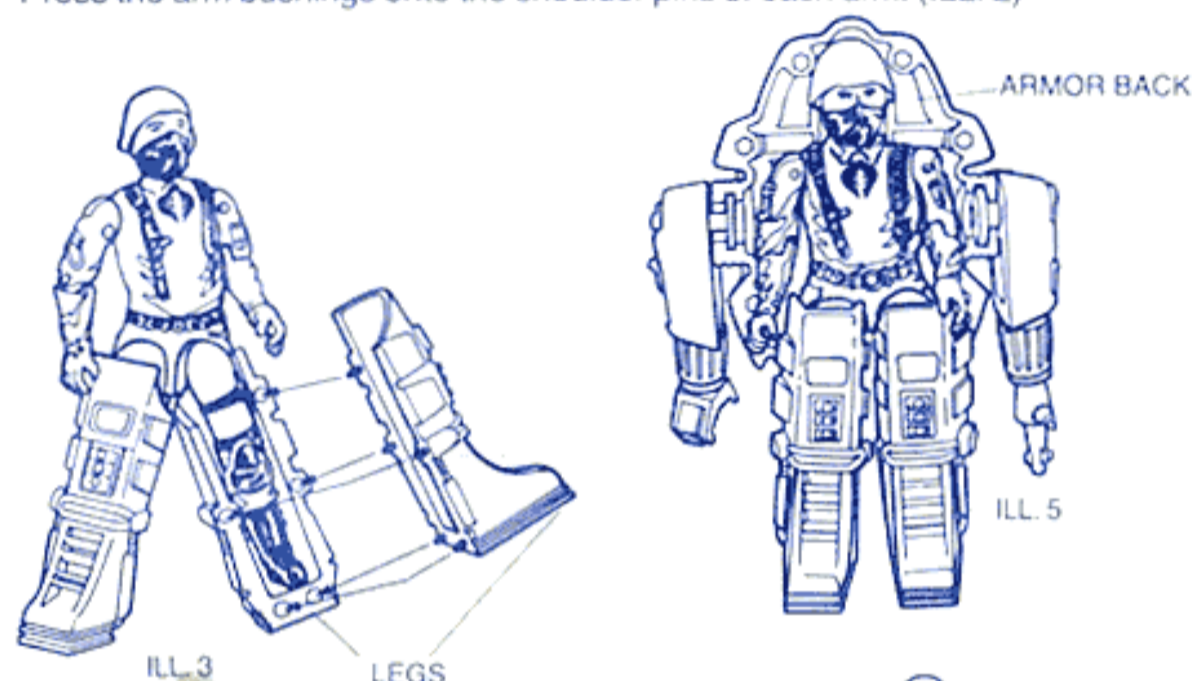

Designed by Destro and his scientists at MARS (Military Armament Research System), "S.N.A.K.E." is a powerful form of battle armor. It protects COBRA soldiers from G.I. Joe because its heavy armor plating repels bullets and explosive blasts. When captured, G.I. Joes are placed inside the "S.N.A.K.E." Its powerful sensors easily brainwash them into thinking and acting like COBRAs!

Remove the backpack from your figure before you put him into the "S.N.A.K.E."

NOTE: Apply labels before "S.N.A.K.E." assembly.

1. Follow the instructions and remove each "S.N.A.K.E." piece, as needed, from the runners. It may be necessary to remove excess plastic from the pieces with safety (round-ended) scissors.
2. Fit the four weapons into the weapon connectors. Fit two of the weapon connectors onto the pins at the end of each "S.N.A.K.E." arm. (ILL. 1) After assembling the "S.N.A.K.E.," you can fit two more weapon connectors with weapons onto the pegs on armor back.
3. Press the arm bushings onto the shoulder pins of each arm. (ILL. 2)

4. Press the front and rear "S.N.A.K.E." legs together over the figure's legs. Make sure that the "V" slot at the top of each leg piece is in the inside of the legs.
5. Place the two arm bushings into the grooves in armor back. (ILL. 4)
6. Lay the back of the "S.N.A.K.E." on a flat surface. Bend the elbows of your figure and place him on top of the armor back. (ILL. 5)
7. Press armor front and armor back together over the figure. Now you can fit two weapons with weapon connectors onto the pegs on armor back. Your "S.N.A.K.E." is ready for action! NOTE: Weapons are interchangeable with weapon connectors.
8. To store your "S.N.A.K.E.," use the rubber stand provided. Follow the steps above and assemble the "S.N.A.K.E." using the rubber stand in place of a figure. (ILL. 6)

Carefully peel labels from label sheet and apply to your "S.N.A.K.E." as shown.
