ROLLING POSITION

BATTLE POSITION

- 1 Snap top body onto bottom body. (ILL. 1)
- 2 Snap swivel base onto chassis. (INSET) Line up holes in swivel base with body. (ILL. 2)
- 3 Snap left cannon onto end of shaft as shown. (INSET) Fit shaft through holes in swivel base and body. Attach right cannon to end of shaft as shown. Clip shields and barrel caps onto cannons. (ILL. 3)
- 4 Snap wheels and rear stabilizers onto knuckles as shown. (ILL. 4)
- 5 Turn body over. With ridges on knuckles facing out, snap wheel knuckles into middle mounts and stabilizer knuckles into rear mounts. Snap front stabilizer into front mount as shown. (ILL. 5)
- 6 Fit posts on roll cage into holes in body. Fit tab on generator cover into slot and close. (ILL. 6)
- 7 To insert figure, tilt ASP body forward and lift roll cage. (Figure not included.) Figure's knees must be moved into seated position. Close roll cage and insert tab into slot. (ILL. 7)
- 8 Flip stabilizers up and wheels out to put into rolling position. (INSET) Flip wheels under the chassis and stabilizers down for battle position. (ILL. 8)
