DEVILFISH INSTRUCTIONS

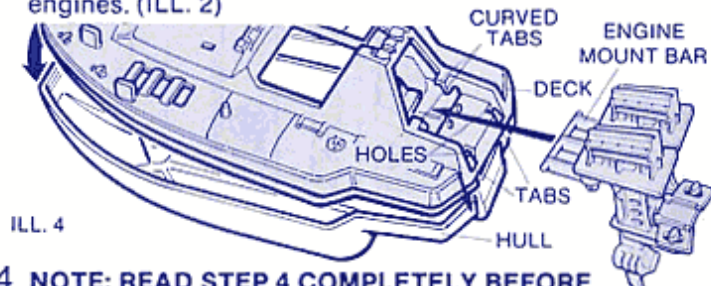

- 1 A Snap tabs on panel into holes in back of seat. (ILL. 1A)
- B With seat facing forward, press seat firmly into hull. (ILL. 1B)

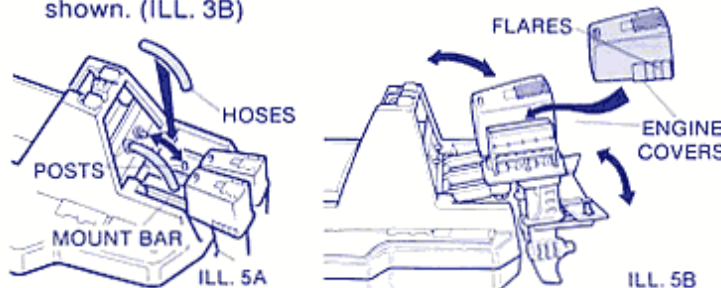

- 2 Insert tab on engine into one hole in link bar. Swing engine to rounded side of link bar. Repeat with other engine. (Make sure rounded side of link bar faces engines. (ILL. 2)

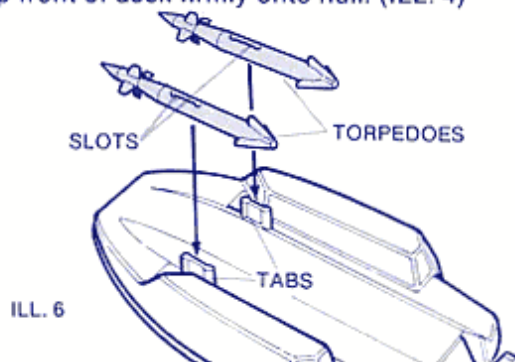

- 3 A Hold engine mount with curved side up as shown. (ILL. 3A)
- B Insert posts on engines into holes of engine mount as shown. (ILL. 3B)

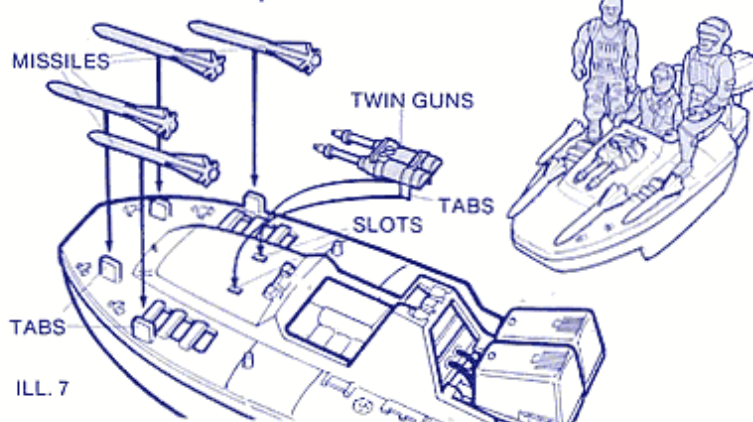

- 4 **NOTE: READ STEP 4 COMPLETELY BEFORE CONTINUING.** Snap tabs on back of hull firmly into holes in back of deck. **DO NOT SNAP FRONT OF DECK AND HULL TOGETHER.** Slide ends of engine mount bar under curved tabs on back of deck. Now snap front of deck firmly onto hull. (ILL. 4)

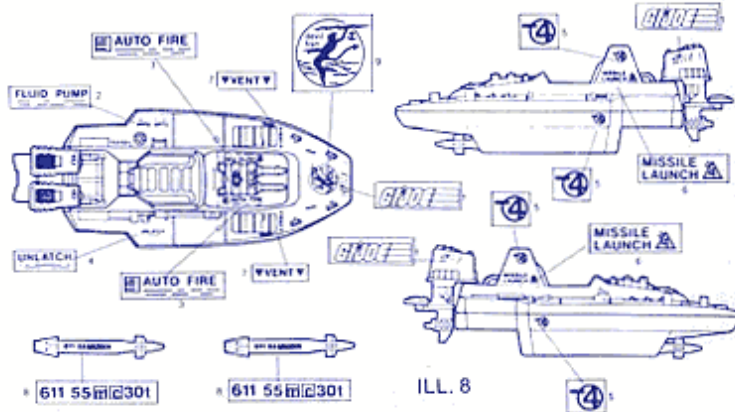

- 5 A Fit ends of 2 hoses over posts between engine mount bar. Fit opposite ends onto posts on panel. (ILL. 5A)
- B With flares in back, press engine covers over engines. (ILL. 5B) When docking the Devilfish, raise engines and lock into position.

- 6 Turn your Devilfish over. Fit slots in underwater torpedoes over tabs. Press down firmly. (ILL. 6)

- 7 Insert tabs on twin guns into slots in deck. Fit slots in 4 missiles over tabs on each side of deck. (ILL. 7)

- 8 Peel and apply labels as shown. (ILL. 8)

IMPORTANT MESSAGE FROM HEADQUARTERS: HAWK has requested that three Joes operate the Devilfish during all routine maneuvers. Only one Joe will operate the Devilfish on dangerous missions. (For best operation in water, place one or three figures in Devilfish.)
