BOMB DISPOSAL UNIT 1985

Tactical battlefield bomb disposal rover and containment unit.

ACQUISITION DATE	CONDITION / GRADE	ESTIMATED VALUE (\$)	MISSING PARTS COUNT
_____	_____	_____	_____

GOT	QTY	PART NAME (OFFICIAL ENGLISH)	SPECIFIC IDENTIFICATION REFERENCE DETAILS
<input type="checkbox"/>	1	Bomb Disposal Rover Body	Olive green specialized robotic rover chassis.
<input type="checkbox"/>	1	Robotic Claw Arm	Three-piece articulated mechanical arm with claw attached to rover.
<input type="checkbox"/>	1	Bomb Container / Hazard Box	Square green box with removable lid to transport unexploded ordnance.
<input type="checkbox"/>	1	Hazard Box Lid	Green matching lid snapping onto the containment box.
<input type="checkbox"/>	2	Bombs / Grenades	Small loose silver or grey explosive models placed in the box. VERY EASY TO LOSE.

MISSING PART TRACKER & INSPECTION ALERT:

The tiny pegs on the articulated claw arm are brittle and snap if forced. The loose bombs are almost always missing from loose sets.
